DETAILED ACTION

Allowable Subject Matter

1. Claim 1 and 8 – 15, now renumbered 1 – 8 are allowed.
2. The following is an examiner's statement of reasons for allowance: the prior art does not anticipate, nor does it suggest, the combination as now claimed in the claims. Specifically, using intensity values and saturation values calculated by, $I=(R+G+B)/3$ and $S=1-\text{Min}(R,G,B)/I$, respectively, in order to determine whether an image is a color, gray scale, or black and white image. Also, determining whether an image is a color, gray scale, or black and white image by comparing intensity and saturation density values to a first threshold followed by calculating a histogram, thresholding, applying a dilation or erosion function, and subjecting the output to a second threshold to determine the image composition. These elements in combinations with the remaining components of the independent claim are not taught nor are suggested by the prior art.
3. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
